

Market Expansion Strategy

From Irish GP clinics to a global healthcare platform.
Where to expand, what's easy, and what's hard.

Market size by clinic type and region

	Ireland	UK	EU	Canada	USA
GP / family medicine	2,500	7,750	180,000	20,000	200,000
Physiotherapy	400	12,000	80,000	25,000	375,000
Aesthetic clinics	250	5,600	25,000	8,000	35,000
Skin clinics	200	3,000	15,000	4,000	18,000
Chiropractic	80	1,500	4,000	9,000	70,000
Hair transplant	15	300	2,000	500	2,500
TOTAL	3,445	30,150	306,000	66,500	700,500

Biggest opportunities by volume

USA — GP practices 200,000	Hard	HIPAA compliance + US insurance billing required
USA — Physiotherapy 375,000	Hard	Massive market but heavy localisation
EU — GP practices 180,000	Hard	Per-country healthcare system differences
EU — Physiotherapy 80,000	Medium	Less regulation than GP, more portable
USA — Chiropractic 70,000	Hard	Large but US insurance complexity
Canada — Physio 25,000	Easy	English-speaking, similar model
Canada — GP 20,000	Medium	Provincial billing differences
UK — Physiotherapy 12,000	Easy	English, no NHS gatekeeping for private
UK — GP practices 7,750	Medium	NHS contract complexity

UK — Aesthetic 5,600	Easy	Fast-growing, high willingness to pay
Ireland — GP 2,500	Easy	Home market, built for this

What's easy and what's hard

Easy — plug and play

Medium — some localisation

Hard — regulatory work

Very hard — major compliance

Market	Language	Regulation	Billing	Overall
Ireland — all clinics	English	GDPR (done)	Stripe + PCRS	Easy
UK — aesthetic/physio/chiro	English	GDPR + CQC	Stripe only	Easy
UK — GP (NHS)	English	GDPR + NHS	NHS contract	Medium
Canada — private clinics	English	PIPEDA	Stripe only	Easy
Canada — GP (provincial)	EN/FR	PIPEDA	Provincial billing	Medium
EU — private clinics	Translate	GDPR (done)	Stripe	Medium
EU — GP (public)	Translate	Per-country	National system	Hard
USA — private clinics	English	HIPAA	Stripe only	Medium
USA — GP/medical	English	HIPAA	US insurance	Very hard

Why some are easy, others hard

Easy markets share three things: **English language**, **GDPR (already built)**, and **Stripe-only billing** (no government claims). UK private clinics (aesthetic, physio, chiro) and Canadian private clinics fall here. Zero regulatory work — just deploy and sell.

Hard markets have one or more blockers: **non-English language** (EU requires full translation), **government billing systems** (NHS contracts, US insurance, provincial billing), or **different compliance regimes** (HIPAA in USA, per-country rules in EU). These need 3-6 months of localisation each.

Expansion roadmap

Phase 1	Home market	Now — Month 12
Ireland — GP practices	2,500 clinics	Easy
Ireland — all clinic types	+945 clinics	Easy
Already built. Win 5% = 172 clinics = €310K ARR. Proves the product.		

Phase 2	UK private clinics	Month 6 — 18
UK — aesthetic clinics	5,600 clinics	Easy
UK — physiotherapy	12,000 clinics	Easy
UK — chiropractic	1,500 clinics	Easy
No NHS complexity. Stripe billing. GDPR done. Same language. Fastest expansion. £3.6B aesthetic market growing 8-10%/yr.		

Phase 3	Canada	Month 12 — 24
Canada — private clinics	~42,000 clinics	Easy
Canada — GP (provincial)	~20,000 practices	Medium
English-speaking. Similar public/private model. Provincial billing adds complexity for GP but private clinics are plug-and-play.		

Phase 4	UK NHS + EU	Month 18 — 36
UK — GP (NHS)	7,750 practices	Medium
EU — private clinics	~45,000 clinics	Medium
NHS requires contract-specific billing. EU requires per-country translation but GDPR is done. Start with English-speaking EU (Malta, Netherlands).		

Phase 5	USA	Month 24 — 48
USA — private aesthetic/physio	~100,000 clinics	Medium
USA — GP / primary care	~200,000 practices	Very hard
HIPAA compliance = 3-6 months. US insurance billing = major build. Start with cash-pay private clinics (aesthetic, chiro) before tackling insurance.		

Revenue potential at scale

Conservative projections at €150/clinic/month average

Phase	Market	Target clinics	Penetration	ARR
Year 1	Ireland — all types	3,445	5% (172)	€310K
Year 2	Ireland + UK private	22,545	3% (676)	€1.2M
Year 3	Ireland + UK + Canada	84,545	2% (1,691)	€3.0M
Year 4	All + EU private	129,545	2% (2,591)	€4.7M
Year 5	All + USA private	229,545	1.5% (3,443)	€6.2M

Your competitive moat

AI voice agent (Síle)	No competitor has an integrated voice AI that books, delivers results, and recalls patients. This is 2-3 years ahead of the market.
AI clinical scribe	Ambient SOAP note generation during consultations. PPS has basic AI notes but nothing at Cúram's level.
Local bridge agent	Unique architecture for connecting to legacy systems (HealthLink, Carepatron) without formal API access.
Multi-clinic platform	One codebase serves GP, aesthetic, physio, chiro, skin — competitors are single-vertical.

Cúram — AI-first practice management for healthcare worldwide.
